Welcome to the Spring 2024 edition of the Water Works Ponds Newsletter!

As the drab brown of winter fade and spring begins to bloom we are excited to reconnect with

our valued clients. We look forward to seeing familiar faces at the shop and meeting new water feature enthusiasts throughout the season. We continue to offer professional grade equipment, installation and unparalleled knowledge to support you in building and maintaining your water feature.

We are committed to competitive pricing on all of our products and services.

Happy reading, and we hope to see you soon!

EXCITING NEWS: WATER WORKS PONDS FINDS A NEW HOME!

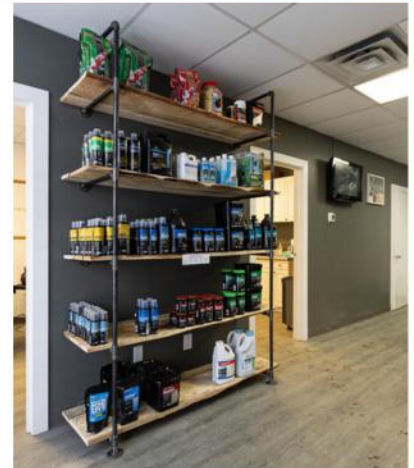

Two years ago, WWP moved from it's original Ellerslie Rd location to a shared space at 9535 62 ave.

This winter, we moved all our operations into our own space on the west side of the building.

Our new location not only provides us with a dedicated space to better serve your aquatic needs, but also offers enhanced accessibility and convenience. Our new home promises ease of access and ample parking for your convenience.

Whether you're in search of expert advice, premium pond supplies, or professional services, our team is here to ensure that your water feature dreams come to life.

It is your trust and loyalty that have allowed us to grow and thrive, and we are deeply grateful for the opportunity to continue serving you in our new location.

PRODUCT PROFILE

SupaClear

Unfortunately, Profix is no longer available for regular water garden maintenance. However, SupaClear is now on the Canadian market and is the closest equivalent to Profix. We started stocking mid-season last year and have had great success with it.

- Clears Water In Up To 24-48 Hours of Application
- Effective in controlling excess green growth
- Can Be Used In Ponds Containing Fish & Plants

REVIVING PARADISE: THE REJUVENATION OF THE MUTTART CONSERVATORY TROPICAL PYRAMID'S WATERFEATURE

For nearly two decades, the Tropical Pyramid at the Muttart Conservatory has been a sanctuary of lush greenery and exotic flora, captivating visitors with its vibrant beauty and tranquil ambiance. Yet, as time marches on, even the most enchanting landscapes require rejuvenation. Thus, we began a transformation on the pond and waterfall feature within the Tropical Pyramid underwent a transformation

Overgrown vegetation obscured the feature, including a large palm whose roots had punctured through the pond liner.

Over the years, soil had washed into the feature, making it difficult to clean and maintain.

In fact, we took out almost 2 wheelbarrows of mud. The stream and pond edges had settled and eroded, causing numerous leaks. Old filtration equipment was not capable of handling the waste load of the feature. Recognizing the need for revitalization, the City of Edmonton and the Muttart Conservatory jumped at the opportunity to have Water Works Ponds restore this beloved feature to its former glory.

The transformation was nothing short of remarkable. Overgrown foliage was carefully pruned back, unveiling the hidden beauty of the waterfalls.

Leaks were meticulously repaired, including a new pond liner ensuring the pond's longevity for years to come. The stream and waterfall, once choked by opportunistic banana trees, flowed freely once more, their gentle cascade harmonizing with the lush tropical greenery that surrounds them. Additionally, a modern and efficient pressure filter was added to keep the water clear and healthy.

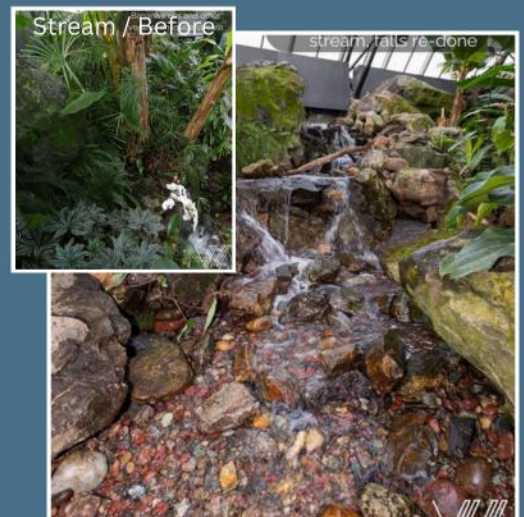

Today, as visitors meander through the pyramid, they can again enjoy the sights and sounds of a beautiful water oasis surrounded by a lush, tropical environment.

SPRING START-UPS

As the chill of winter gives way to the warmth of spring, the time has come to awaken your dormant water feature from its seasonal slumber. The time taken to complete a thorough spring start-up will ensure your water feature is clean and healthy through the season. Done improperly, it can pave the way for unsightly water quality issues, tarnishing the beauty of your outdoor oasis. This is where our experienced crew steps in, dedicated to ensuring your water feature flourishes as the season unfolds.

One common issue post-winter is the accumulation of nutrient-rich detritus within the system, providing a fertile breeding ground for algae. This detritus is often old algae, leaves fish waste and other organics that have broken down through the winter. A mere cosmetic makeover won't suffice. What's needed is a meticulous flushing-out process, eliminating the accumulation of sludge during our long winter. We take pride in going beyond surface-level cleaning.

Our team conducts a thorough job, meticulously flushing out your water feature to rid it of

accumulated debris and detritus. By addressing the root of the issue, we pave the way to get your water feature set up for success for a season of clear, sparkling water.

Timing is of the essence. To ensure your water feature receives the attention it deserves, be sure to reach out to us early. We strive to accommodate each client promptly, getting everyone up and running in a timely matter. With over 200 features to start-up, our crew will begin working tirelessly as soon as the snow melts.

Pond Tour

After a few years hiatus, Water Works Ponds again hosted a pond and water feature tour in 2023. Proceeds of the event went to support a worthy local charity, the 'Dogs With Wings Assistance Dog Society'. We are happy to announce the tour will be back again this summer.

We are planning to increase the number of locations showcasing a variety of water features, from traditional fish ponds to modern stainless steel features. Proceeds will again go to the 'Dogs With Wings Assistance Dog Society'. The tour will run on July 20th & 21st, rain or shine. It will again be a self guided tour where you can visit as many or as few locations as you would like. Tickets will be \$10 per person, Call today to be added to our contact list for tickets

EDMONTON HOME & GARDEN SHOW

Showcasing Captivating Water Features at the Edmonton Home and Garden Show

stunning room divider waterfalls to tranquil rock bubbler features. From design considerations to maintenance tips, attendees had the opportunity to engage in meaningful conversations and gain valuable knowledge about incorporating water features into their outdoor spaces.

It was also a nice opportunity to chat and catch up with some of our clients visiting the show too.

Water Works Ponds returned to the Edmonton Home and Garden Show. This event always reminds us that winter is releasing her grasp and soon we will be able to fire up our water features again. Held from March 21st to March 24th, attendees had the opportunity to explore the mesmerizing world of water features showcased by our booth. The exhibit featured a diverse array of stunning water features, ranging from our visually
